

Cassville R-IV Middle School
1501 Main Street
Cassville, Missouri 65625

Dear Parent/Guardian,

The State of Missouri requires that all students entering eighth grade receive a TDaP vaccine as well as a meningococcal vaccine. There are two brand names of the meningococcal vaccine: Menactra and Menveo.

Your student _____ (DOB) _____
Will need a TDaP and the meningitis vaccine prior to eighth grade.

Your student may receive the vaccine from several sources:

1. Your health care provider by appointment. Make sure your doctor's office stocks vaccines.
2. Barry County Health Department if you have Medicaid or are uninsured for vaccines M-Th 7:30 am - 6 pm.
3. Access Family Care by appointment 847-0057
4. Sater Healthmart Pharmacy
5. Walmart Pharmacy
6. Cox Health Care Mobile(on site at Cassville Schools on select dates). Please contact your nurse's office for specific dates. *The Care Mobile will see students with private insurance, Medicaid or uninsured. If you choose to utilize the Care Mobile, please send a copy (front and back) of your student's insurance card.*

We wanted to give you and your student plenty of time to make plans and receive the required doses.

Eighth graders will need to provide the school with written documentation of the vaccine(s) given with month/day/year, **prior to receiving their schedule or locker assignment next year.**

Any questions?

Airica Fox, RN 417-847-4040
